
Looking for ptpChat2 Beta Testers

Posted by philone - 2008/05/19 21:51

Hey Everyone,

In an attempt to make ptpChat (1 and 2) better software I am looking to form a group of people to help throw around ideas. This group would basically be the BoraWare IRC board of directors. I am looking for people that use IRC on their Palm device on a regular basis. These people should be able to test both ptpChat1 and ptpChat2 and give me feedback on new features as well as new bugs that arise. In return, I will be giving free licenses to ptpChat and possibly other BoraWare software to these people. Please reply to this post and let me know if you're interested.

Hi,
I'm interested. I would test it on a Treo 650 GSM.

I am interested Phil and we spoke on IRC earlier this evening.
I am running a Palm Centro

I be willing to help. :D
I would be running my Sony Clie UX50 :D
Thanks,
Bensawsome

Thanks guys. As soon as I refine a few more things I will be sure to get each of you a copy of ptpChat2 *and* a free license for it. In turn all I ask is that you help suggest features and report bugs. Thanks again.

Hey,

Signing up as promised. Count me in for the beta test. I'll be testing on a centro, btw.

Well the beta is ready, now for some code clean up and registration stuff and it'll be good to go. I'll email all of the testers directly with the next steps when things are ready.
